This handbook will appeal to graduate students of economics, banking and finance, academics, practitioners and policy makers. Consequently, the book strikes a balance between abstract theory, empirical analysis, and practitioner and policy-related material. The handbook is split into five parts. Part I, The Theory of Banking, examines the role of banks in the wider financial system, why banks exist, how they function, and their legal and governance structures. Part II entitled Regulatory and Policy Perspectives discusses monetary policy, prudential regulation and supervision, and antitrust policy. Part III deals with Bank Performance. A number of issues are assessed including efficiency, financial innovation and technological change, globalization and ability to deliver small business, consumer, and mortgage lending services. Part IV of the book provides an overview of Macroeconomic Perspectives in Banking. This part includes a discussion of the determinants of bank failures and crises, and the impact on financial stability, institutional development, and economic growth. Part V examines International Differences in Banking Structures and Environments. This part of the handbook examines banking systems in the United States, Western Europe, Transition countries, Latin America, Japan and the developing nations of Asia.
