

Safety Engineering Volume 28 (1914)

By Books Group

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1914 Excerpt: .did not overlook the loof of the four-story building, and they could not reach these rooms, as they were unable evidently to pass through the halls. The building was not what is commonly termed a fire trap. It was of substantial construction and well adapted for its original occupany as a mercantile warehouse, and although its hazards were increased by the alteration made when it was converted into a club house, it could hardly, from an insurance point of view, be considered a bad risk. These alterations were not of a flimsy character. The most serious change was the removal, to improve the appearance, of the fire doors from the elevator and stair shafts. The fact stands out, however, that a building of that height and of combustible construction is not safe for the housing or gathering of a large number of people, and no interior...
