

## The Relations of Abstract Research to Practical Invention (Paperback)

By Frank Wigglesworth Clarke

Createspace Independent Publishing Platform, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. The Relations of Abstract Research to Practical Invention is a short essay by Frank Wigglesworth Clarke. Frank Wigglesworth Clarke (March 19, 1847 - May 23, 1931) of Boston, Massachusetts, and Washington, D.C. was an American scientist and chemist. Sometimes known as the Father of Geochemistry, Clarke is credited with determining the composition of the Earth's crust. He was a founder of The American Chemical Society and served as its President, 1901. Professor Clarke was the first theorist to advance a hypothesis regarding the evolution of elements. This concept emerged early in his intellectual career. His *Evolution and the Spectroscope* (1873) appear in *Popular Science Monthly*. It noted a parallel evolution of minerals, accompanying that of plant life. He was known for pushing mineral analysis beyond analytical results. He sought compilations of the associations, alterations, and syntheses of each mineral sample. His study *Constants of Nature* (Smithsonian Institution 1876) was one of the first collections of both physical and chemical constants. The USGS's Atomic Weights series became standard references for the chemistry and geochemistry professions and academic fields....
