paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 229 Publisher: Higher Education Pub. Date :2011-02-01 version 1. Calculus (Vol.2) is the National Education Science Eleventh Five-Year Plan project our colleges and universities of applied training model Math class is one sub-topic research projects. Materials based on mathematical foundations of economics and management undergraduate teaching and in recent years. the basic requirements of the national graduate entrance examination Mathematics syllabus content and requirements written in order to develop and improve students' mathematical literacy. innovation. analyze and solve practical problems the ability for the purpose. in order to cultivate talents for Applied Economics and Management as the main target. This textbook seeks to popular. intuitive. concise. accurate. and the main contents of vector algebra and analytic geometry of space. multi-function differential calculus. double integral. differential equations and differential equations. infinite series. In order to develop and improve students' proficiency and ability. write in the appropriate section of mathematical modeling of experimental and mathematical content. and with Matlab software. allow the computer to complete the plane and space curves. surfaces of the mapping space. find the multi-function differential to...

### Reviews

*This book may be really worth a read through, and far better than other. it was actually writtern extremely completely and valuable. I am just very easily will get a satisfaction of looking at a published ebook.*
